

InnovAge Consent Approval for Enable Dental (On-site Visit)

Enable Dental provides on-premise dental services to patients in the InnovAge PACE program. All financial costs are paid for directly by InnovAge. You must sign this consent to receive services.

Our contact information:

info@enabledental.com

512-861-1337

Please answer the following health history information, if available:

Who are you? Responsible Party Patient

Has the patient had a stroke in the last year? Yes No

Is patient taking bisphosphonates
(osteoporosis medication)? Yes No

Is patient currently taking prescription blood thinners? Yes No

Does patient have any artificial heart valves? Yes No

Does the patient have any allergies? Yes No

List any allergies here _____

Authorization and Release

This dental consent may be withdrawn at any time. The patient, legal guardian, or healthcare surrogate, if any, authorizes the attending doctor and dental team from Enable Dental's affiliated dental practice to review existing medical records, examine, and provide dental care, if necessary, to the named patient. The patient, legal guardian, or health surrogate, if any, has read and fully understands the General Dental Informed Consent and HIPAA Notice of Privacy Practices. No guarantee or assurance has been made to the patient, legal guardian, or healthcare surrogate, if any, concerning the results, which may be obtained. The patient, legal guardian, or healthcare surrogate, if any, authorizes the attending doctor to provide continued care on the following schedule until dental consent is withdrawn.

By signing below, you are acknowledging that:

- You are either the patient or have full financial and medical legal decision-making capability for the named patient.
- You have read and agreed to the General Dental Informed Consent. A current copy of the General Dental Informed Consent is also posted on our website for your reference.
- If applicable, you give the care community explicit consent to share patient health information (medical history, medication lists, responsible party information) with us as the patient's healthcare provider. You also allow Enable Dental to send patient information, notes, and post-op information to the care community to facilitate continuity of the patient's overall care and well-being.
- You consent to receiving HIPAA-compliant electronic communications, such as email and text messages regarding treatment, payment, and health care operations. You will consent to our use and disclosure of the patient's protected health information to carry out treatment payment activities, and healthcare operations. Notice of Privacy Practices: Please read them at <https://enabledental.com/HIPAA>

GENERAL DENTAL INFORMED CONSENT

We would like for the patient/POA to have general knowledge of dental procedures. We ask that you review the procedures listed and want you to know that we will have you sign an informed consent prior to each dental procedure.

1. Low Dose X-rays: Low dose x-rays are an important tool to aid the dentist in detecting potential issues and disease not visible to the naked eye. We utilize protective shields and aprons for patient safety. Low dose x-rays are required for all new patients of record and will be taken every 6 months.
2. Drugs and Medication: Antibiotics and analgesics and other medications can cause allergic reactions causing redness and swelling of tissues, pain, itching, vomiting, and/or prophylactic shock (severe allergic reaction).
3. Changes in Treatment: During treatment it may be necessary to change or add procedures because of conditions found while working on the teeth that were not discovered during examination. The presence of dental tooth decay, gum disease, or any dental infection has been shown to affect many other body parts, such as joints and the heart, so it is important to treat any dental infection as soon as possible.
4. Local Anesthesia: Local anesthesia may affect your body such as dizziness, nausea, vomiting, accelerated heart rate, slow heart rate, or various allergic reactions potentially requiring hospitalization. Injury to the nerves that can result in pain, numbness, or tingling to the chin, lip, cheek, gums, or tongue may be present for weeks, months and rarely be permanent.
5. Fillings: In some situations, more extensive restoration than originally planned may be required due to additional conditions discovered during tooth preparation. Significant changes in response to temperature may occur after tooth restoration such as temporary sensitivity or pain. If the tooth does not respond to treatment with a filling, further treatment such as root canal therapy or crown may be necessary. Fillings may require periodic replacement with additional fillings and/or crowns.
6. Extractions: Alternatives will be explained to you (root canal therapy, crowns, and periodontal surgery, etc.) The removal of teeth does not always remove all the infection, if present, and it may be necessary to have further treatment. Some of the risks are pain, swelling, spread of infection, dry socket, loss of feeling in teeth, lips, tongue and surrounding tissue that can last for an indefinite period of time (days or months) or fractured jaw. Further treatment by a specialist or even hospitalization may be needed if complications arise during or following treatment which would be your financial responsibility.
7. Crowns and Bridges: Sometimes it is not possible to match the color of natural teeth exactly with artificial teeth. You may wear temporary crowns, which may come off easily so avoid sticky food and candies. You will need to be careful to ensure that they are kept on until the permanent crowns are delivered. The final opportunity to make changes to a new crown, or bridge (including shape, fit, size, or color) must be done at the preparation appointment.
8. Dentures (complete and partials): Removable prosthetic appliances include risks and possible failures. This includes gum tissue pressure, jaw ridges not providing adequate support and/or retention, excessive saliva or excessive dryness of the mouth, and general psychological, behavioral, and physical problems interfering with success. We are not responsible for failures of these types. Breakage is possible by dropping the dentures or chewing on foods that are excessively hard. Full dentures become loose when there is a change in gum tissues. Our obligation is to create a functioning, well-fitting device. Patients must wear the device consistently in order for the dentist to make appropriate and accurate adjustments. Any denture fit issues must be brought to our attention within 30 days of the final denture delivery. Adjustments after 30 days are an additional charge.
9. Immediate/Interim Dentures: After the extractions and delivery of the prefabricated immediate denture, there is fast bone loss resulting in space between the dentures and gums. This leads to rapidly increasing looseness and sore spots which must be adjusted frequently. The dentist may recommend a soft or hard reline (additional charge) if the patient experiences discomfort during the healing period to improve fit.
10. Endodontic Treatment (Root Canal): There is no guarantee that root canal treatment will save a tooth. Complications can occur from the treatment and occasionally metal objects are cemented in the tooth or extend through the root, which does not necessarily affect the success of the treatment. Occasionally additional surgical procedures may be necessary following root canal treatment.
11. Complaints: Please contact us directly at info@enabledental.com with any complaints or issues. A manager will handle the complaint and address any issue you may have to your satisfaction. Patients in Texas can submit a formal complaint to: Texas State Board of Dental Examiners, 333 Guadalupe Tower 3, Suite 800, Austin, Texas 78701-3942 or by calling (512) 463-6400.
12. Teledentistry: If allowable in your state, you consent to utilizing synchronous (live chat via video) and asynchronous teledentistry (not live). Asynchronous teledentistry utilizes a dental assistant or dental hygienist to collect clinical data and information in-person on behalf of a licensed dentist. This information is sent asynchronously (not live) to the licensed dentist to review and provide recommendations. The results of this exam are then communicated to the patient or responsible party. The dentist may not see the patient in-person. You may request to communicate in real-time with the dentist about these findings within 30 days of the consult.
13. Clinical Services: All clinical services are rendered by a dentist owned entity including but not limited to Texas Mobile Dentists Inc, Tsang Mobile Dental PLLC, A. Nguyen Dental Corporation, and Scuyler Kurlbaum DDS Mobile LLC.
14. COVID-19: Our clinical teams follow all CDC, state dental board, and OSHA guidelines relating to COVID-19. Read our detailed guidelines at enabledental.com/covid-19. There exists a potential risk of exposure with any human interaction given community spread. Our protocols and procedures err on the side of caution.
